OSU National Summer Transportation Institute (NSTI)

The National Summer Transportation Institute (NSTI) Program is an initiative developed by the Federal Highway Administration (FHWA) to introduce underrepresented minority high school students to transportation-related careers via elaborately designed, hands-on learning experiences. The school of civil and Construction Engineering (CCE) delivers a week-long national summer transportation Institute on the OSU campus. Dr. Hurwitz serves as the Director of the program developing the weeklong curriculum and managing 4 to 8 instructional staff to deliver the curriculum.

ASCE: Excellence in Civil Engineering Education (ExCEED)

The ExCEED Teaching Workshop is a six-day practicum that provides engineering educators with an opportunity to improve their teaching skills. ASCE has presented this workshop each summer since the early 2000s. Faculty members from across the country and around the world have benefited from this workshop. Acceptance rates for the weeklong program are commonly less than 50% due to the high demand for participation (over 100 applications from professors) and limited capacity (48 slots per year). Workshop mentors are exemplar engineering educators from around the country.

Dr. Hurwitz participated as a student in a mini-ExCEED (2 days), the week-long ExCEED (6 days), and ExCEED II (3 days). Additionally, he helped staff the workshop as an Assistant Mentor for five years and helped manage the program as a member of the ASCE Faculty Development Committee for four years where he helped select the participants and staff, allocated budgets, and reviewed workshop content.
